

DECLASSIFIED

TOP SECRET // NOFORN // ORCON

CONTROL NO: 2026-XQ-0944

DATE: 07 SEP 1963

SUBJECT INTERCEPT: NIGHTSHADE // ALPHA

MEMORANDUM FOR: DIRECTOR, OFFICE OF SPECIAL PHENOMENA (OSP) MI7 **FROM:** CHIEF, DIVISION OF SIGNAL INTERCEPTION (DSI)

SUBJECT: Intercept of Anomalous Physical Communications (Item-99-Omega)

1. (TS//NF) SUMMARY: On 06 SEP 1963, field assets at Point-Alpha intercepted a physical package in transit via a non-standard courier route. The package contains one standard-sized deck of fifty-two (52) playing cards and accompanying letter. Technical analysis confirms the cards utilize a sophisticated, unknown etheric. Preliminary inspection of the deck's inscriptions reveals a series of predictive statements that, upon internal verification, are beyond rational or objective dispute as intelligence genuine. Bridging intelligence analysis required.

2.A. (S//NF) ORIGIN AND ATTRIBUTION CARDS: Both the sender and the intended recipient remain unidentified. Digital forensic tracing of the courier's transit path shows no detectable footprint prior to the Point-Alpha intercept. Linguistic analysis of the "predictions" does not align with any known state-actor code or cryptographic standard.

2.B. (S//NF) ORIGIN AND ATTRIBUTION LETTER "JOKER ONE": Both sender Screwtape and intended recipient Nightshade remain unidentified. Trace connection established to agent C.S Lewis. Reference "Wormwood" being eaten to "Screwtape Letters." Linguistic analysis of "the letter" does not align with any known state-actor code or cryptographic standard.

3. (TS//ORCON) CONTENT EVALUATION: Initial decryption of the cards' inscriptions has yielded high-fidelity intelligence regarding events scheduled and starting AD 0001. Specifically:

- **The King of Spades** contains a precise geographical coordinate and timestamp for a kinetic event that occurred exactly four hours post-intercept.
- **The Seven of Diamonds** lists technical specifications for an adversary's "next-generation" propulsion system, currently classified at the highest level of our own internal research.

4. (S//NF) DISPOSITION: The authenticity of the data is confirmed. However, the mechanism by which these predictions were generated and transmitted remains an intelligence gap of significant concern. The air of the messages is

instructional, yet the "puzzled" nature of the source material suggests a non-human or highly advanced agency. Terrestrial or extra-terrestrial unknown.

5. (TS//NF) RECOMMENDATION: Recommend immediate compartmentalization of Item-99-Omega under Project "CARDS OF HOPE." Division DSI requests technical assistance from OSP to determine if the cards represent a proactive intelligence leak or a new class of predictive defence or charm offensive.

BY DIRECTION OF THE CHIEF, DSI
